

Project Management Methodology Evaluation

70% of digital transformation projects fail to meet desired outcomes.

Boston Consulting Group

Partner with MSS Business Transformation Advisory (MSSBTA) to align your organization's project health, compliance, and quality.

Leverage our **Project Management Methodology Evaluation** to:

- Help assess performance in overall project plan viability and project management practices representing a set of processes and working components, when present, lead to properly managed, successful projects.
- Ensure progress is in alignment with business and technical objectives, employing best practices, and utilizing appropriate control processes and systems to ensure satisfactory completion.
- Provide project team with advance notice of potential trouble—helping prevent implementation problems before they start, for a broad range of system implementation projects.
- Assess deliverable completeness and develop a mechanism for measuring outcomes.
- Pinpoint key project parameters, with key findings and recommendations, to help monitor project health and compliance.

Diagnostics include a quantitative survey and a verbal presentation along with a written report of our findings. Most diagnostics can be completed in 2 to 4 weeks (slightly longer for large organizations).

Your investment,

Project Management Methodology Evaluation

Frequently Asked Questions:

Who needs to be involved? *Executive Sponsor, Project Manager, project team members, and key project stakeholders.*

How long does the Project Management Methodology Evaluation take? The One-Time Evaluation will take approximately 2-4 weeks. This includes meeting with the project team and reporting results.

What is the process?

- One-Time Evaluation - Interviews are conducted to identify potential risks or misalignments, and give recommendations, corrective actions, and a roadmap to implement and track status

- Ongoing Maintenance - Same as One-Time Evaluation plus a cadence to repeat the process on an iterative basis to check the status of action items and reassess the key areas to a successful engagement.

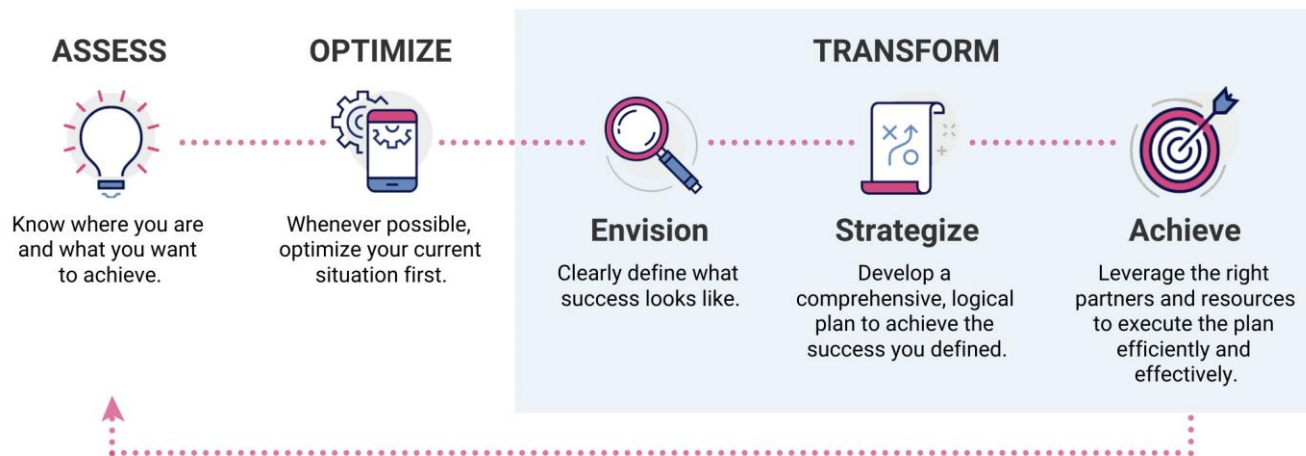

What are the benefits?

Provide an unbiased third-party analysis of your projects, resulting in recommendations and a plan to remedy any outstanding issues.

Provide project stakeholders with confidence, while giving implementation teams the support they need to reach objectives on time and on budget.
