

# 11 Tips to Avoid Common Pitfalls During an ERP Implementation

1

Shield core team from non-ERP distractions

2

Ensure stable and visible leadership

3

Ensure transparency in progress reporting

4

Adequately staff the project

5

Manage scope. Be hyper-focused on critical needs

6

Avoid excessive customization

7

Prioritize business needs over cool features

8

Anticipate critical technical challenges

9

Plan for and manage organizational change

10

Ensure independent 3rd party oversight

11

Manage expectations
